Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' process for the production of at least one hydrofluorocarbon selected from HFC-32, HFC-143a and HFC-152a is unobvious over the prior art of record. Although the closest prior art of record (US Pat. 3,862,995) teaches a process for preparing HFC-32 (difluoromethane) comprising contacting the vinyl chloride with hydrogen fluoride in the presence of an activated carbon impregnated with vanadium trichloride fluorination catalyst, whereby the catalyst is previously activated with hydrogen fluoride gas, the prior art of record does not teach or suggest activating the catalyst with hydrogen fluoride gas along with chlorine gas. Such a modification allows for greater conversion of the reactants and greater selectivity of the desired products. All claims (1-22) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
